## Duster 3000 downdraft

Posted by Pierre - 2008/03/04 14:15

---

I'm interested in purchasing the island clean air duster 3000 downdraft and looking for some feedback on anyone who owns one? I'm looking for a fume collector for sanding and light prime & paint jobs for my 3,800 sq/ft body shop. If anyone has any input (or maybe wants to sell their own) it would be appreciated.

Thanks,

Pierre  
New Brunswick

I purchased two Duster 3000's for my high school auto body program three years ago. The units run all day long and have improved the air quality immensely. My former principal, who has asthma, could not spend any time in my shop before I purchased the Dusters. Once I started using the units she could spend as much time as she wanted in the shop with no breathing problems. I can't say enough good things about the Duster 3000's. I wish more shops would spend the money for Dusters to protect their most important asset, their employees.

We have one for sale. Was used for about 6 months for bumper repair work until we graduated to getting a spray booth. It is in great condition. We are located in Philadelphia, PA.

You can contact me at [npalmer@centralcitytoyota.com](mailto:npalmer@centralcitytoyota.com) or 215-476-1200 x368

The unit has been sold.

Thanks.
